Declaration of Conformity

CE

The CE symbol on your product indicates that it is in compliance with the directives of the Union European (EU). A Certificate of Compliance is available by contacting Technical Support.

This product has passed the CE test for environmental specifications when shielded cables are used for external wiring. We recommend the use of shielded cables. This kind of cable is available from DELTA COMPONENTS. Please contact your local supplier for ordering information.

Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

FCC Class A

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE:

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

RoHS

DELTA COMPONENTS certifies that all components in its products are in compliance and conform to the European Union's Restriction of Use of Hazardous Substances in Electrical and Electronic Equipment (RoHS) Directive 2002/95/EC.

The above mentioned directive was published on 2/13/2003. The main purpose of the directive is to prohibit the use of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE) in electrical and electronic products. Member states of the EU are to enforce by 7/1/2006.

DELTA COMPONENTS hereby states that the listed products do not contain unintentional additions of lead, mercury, hex chrome, PBB or PBDB that exceed a maximum concentration value of 0.1% by weight or for cadmium exceed 0.01% by weight, per homogenous material. Homogenous material is defined as a substance or mixture of substances with uniform composition (such as solders, resins, plating, etc.). Lead-free solder is used for all terminations (Sn(96-96.5%), Ag(3.0-3.5%) and Cu(0.5%)).

SVHC / REACH

To minimize the environmental impact and take more responsibility to the earth we live, DELTA COMPONENTS hereby confirms all products comply with the restriction of SVHC (Substances of Very High Concern) in (EC) 1907/2006 (REACH –Registration, Evaluation, Authorization, and Restriction of Chemicals) regulated by the European Union.

All substances listed in SVHC < 0.1 % by weight (1000 ppm)

Important Safety Instructions

Read these safety instructions carefully

1. Read all cautions and warnings on the equipment.
2. Place this equipment on a reliable surface when installing. Dropping it or letting it fall may cause damage
3. Make sure the correct voltage is connected to the equipment.
4. For pluggable equipment, the socket outlet should be near the equipment and should be easily accessible.
5. Keep this equipment away from humidity.
6. The openings on the enclosure are for air convection and protect the equipment from overheating. **DO NOT COVER THE OPENINGS.**
7. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
8. Never pour any liquid into opening. This may cause fire or electrical shock.
9. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.
10. If one of the following situations arises, get the equipment checked by service personnel:
 - a. The power cord or plug is damaged.
 - b. Liquid has penetrated into the equipment.
 - c. The equipment has been exposed to moisture.
 - d. The equipment does not work well, or you cannot get it to work according to the user's manual.
 - e. The equipment has been dropped or damaged.
 - f. The equipment has obvious signs of breakage.
11. Keep this User's Manual for later reference.

Warning

The Box PC and its components contain very delicately Integrated Circuits (IC). To protect the Box PC and its components against damage caused by static electricity, you should always follow the precautions below when handling it:

1. Disconnect your Box PC from the power source when you want to work on the inside.
2. Use a grounded wrist strap when handling computer components.
3. Place components on a grounded antistatic pad or on the bag that came with the Box PC, whenever components are separated from the system.

Lithium Battery Replacement

Incorrect replacement of the lithium battery may lead to a risk of explosion.

The lithium battery must be replaced with an identical battery or a battery type recommended by the manufacturer.

Do not throw lithium batteries into the trash can. It must be disposed of in accordance with local regulations concerning special waste.

Warranty

This product is warranted to be in good working order for a period of one year from the date of purchase. Should this product fail to be in good working order at any time during this period, we will, at our option, replace or repair it at no additional charge except as set forth in the following terms. This warranty does not apply to products damaged by misuse, modifications, accident or disaster.

Vendor assumes no liability for any damages, lost profits, lost savings or any other incidental or consequential damage resulting from the use, misuse of, or inability to use this product. Vendor will not be liable for any claim made by any other related party.

Vendors disclaim all other warranties, either expressed or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose, with respect to the hardware, the accompanying product's manual(s) and written materials, and any accompanying hardware. This limited warranty gives you specific legal rights.

Return authorization must be obtained from the vendor before returned merchandise will be accepted. Authorization can be obtained by calling or faxing the vendor and requesting a Return Merchandise Authorization (RMA) number. Returned goods should always be accompanied by a clear problem description.

Chapter 1

Introduction

1.1. The Computer

Product Highlights

- 10~21.5" LCD Display w/ LED Backlight
- Flat panel with resistive touchscreen / projected capacitive touchscreen (depending on model)
- Front panel compliant with IP65
- Anti-scratch surface: 7H hardness
- Mini PCIe expansion slot support
- Fanless cooling system
- Cable-less Design
- Low power consumption
- 2 x SMA antenna holes for optional WiFi function

1.2. About this Manual

This manual is meant for the experienced users and integrators with hardware knowledge of personal computers. If you are not sure about the description in this manual, consult your vendor before further handling.

We recommend that you keep one copy of this manual for the quick reference for any necessary maintenance in the future. Thank you for choosing DELTA COMPONENTS products.

1.4. Inside the Package

Upon opening the package, carefully inspect the contents. If any of the items is missing or appears damaged, contact your local dealer or distributor. The package should contain the following items:

1 x 10,1" Fanless Touch Panel-PC w/ 4GB DDR4
*Product appearance varies by model.

1 x **Accessory Box** that contains the following items:

- Driver DVD
- User's manual
- Screws/cable
- 3-pin plug for terminal block

3.2. Jumpers and Connectors

3.2.1 Main Board (FMB-i89U1)

3.2.1.1. Jumpers

① JINV1

Function: Sets LVDS inverter voltage. (This jumper sets the voltage of LVDS connector INV1, which means this jumper decides the pin 1 of the LVDS connector INV1.)

Jumper Type: 2.54mm pitch, 1x3-pin header

Setting:

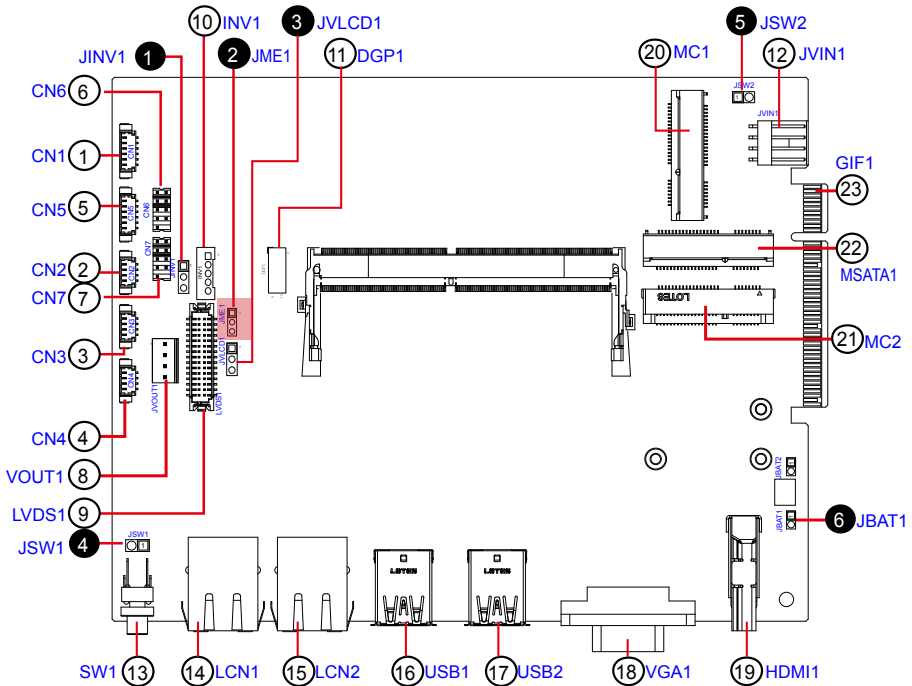

Pin	Description
1-2	+12V (default)
2-3	+5V

② JME1

Function: ME Flash Select Jumper
Jumper Type: 2.00mm pitch, 1x3-pin header
Setting:

Pin	Description
1-2	ME Flash disable (Default)
2-3	ME Flash enable

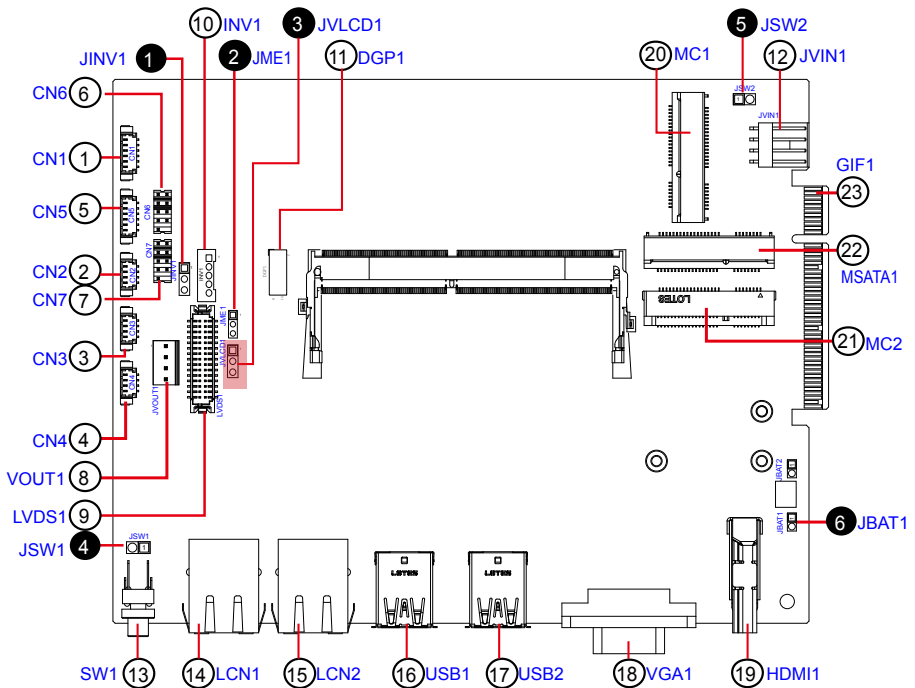

③ JVLCD1

Function: LVDS VDD Voltage Select Jumper

Jumper Type: 2.54mm pitch, 1x3-pin header

Setting:

Pin	Description
1-2	+3V (default)
2-3	+5V

④ JSW1

Function: Power Button
Connector Type: 2.54 mm pitch 1x2-pin header
Setting:

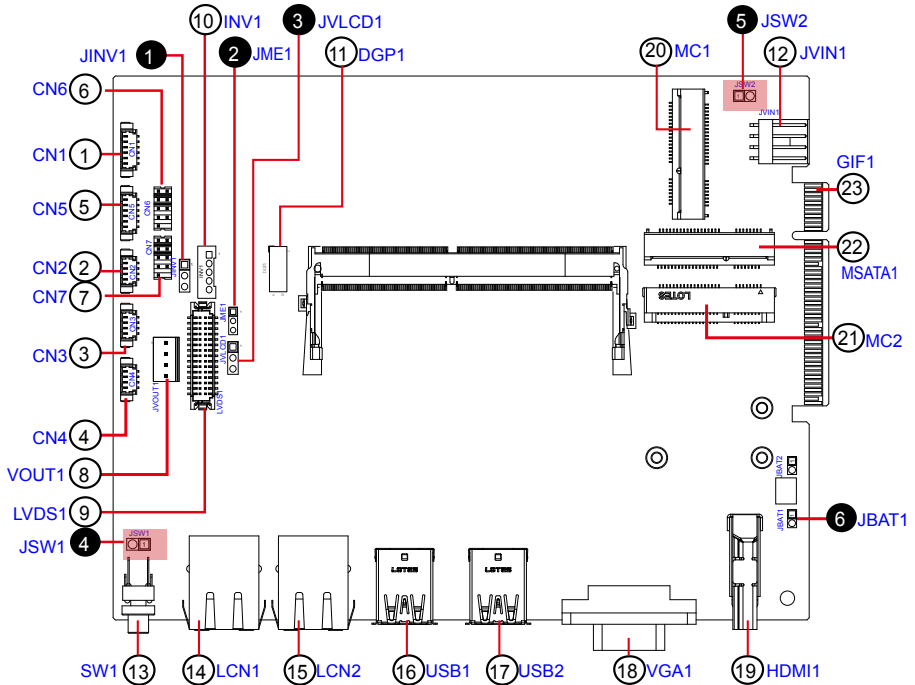

Pin	Desc.	1	2
1	PWR_IN_SW#		
2	GND		

⑤ JSW2

Function: Reset Button
Connector Type: 2.54 mm pitch 1x2-pin header
Setting:

Pin	Desc.	1	2
1	RST_SW#		
2	GND		

⑥ JBAT1

Function: Clears/keeps CMOS
Jumper Type: 2.00 mm pitch 1x2-pin header
Setting:

Pin	Description
Short Clears CMOS	
	
Open Keeps CMOS (default)	
	

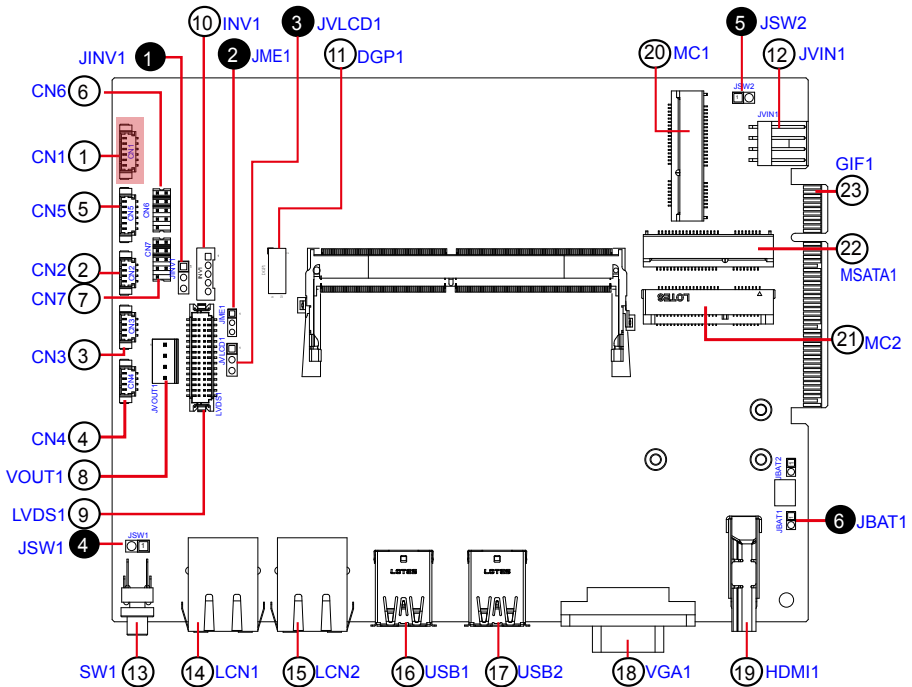

3.2.1.1. Connectors

① CN1

Function: Audio Connector
Connector Type: 1.25mm pitch 1x6 wire to board connector

Chapter 4

Installation & Maintenance

4.1. Disassembly the Computer

The computer's carrier board comes with some connectors to join some devices and also some jumpers to alter hardware configuration. Follow through the guide below to access these components inside the computer.

4.1.1 PKPX8100 / PKPX8105

The PKPX8100 / PKPX8105 comes with a main board inside. The disassembly procedures for these two models are similar. This section will use the PKPX8100 to illustrate the procedures.

1. Loosen and remove the 8 screws from the computer's rear side. Then, loosen and remove the COM/VGA port screws from the top and bottom side of the computer.

2. Dismount the rear cover from the computer. The inside of the computer comes to view. With the bottom side facing you, lift up the bottom side of the main board and disconnect the three connectors as shown below.

3. Carefully lift the main board and set it aside on a flat surface.

4. Then you are ready to access the components of the computer.

4.1.2. APKPX8115 / PKPX8110 / PKPX8120 / PKPX8125

The PKPX8115 / 8110 / 8120 / 8125 come with a main board and a daughter board inside. The disassembly procedures for these models are similar. This section will use the PKPX8125 to illustrate the procedures.

1. Loosen and remove the 8 screws from the computer's rear side.

2. Dismount the rear cover from the computer. The inside of the computer comes to view.

4.2. Install Hardware

4.2.1. Install Wi-Fi Module

The computer comes with one Mini-card socket to load the computer with a wireless module of PCI Express Mini-card form factor: This section will guide you to install the Wi-Fi module.

1. Locate the **PCI Express Mini-card** socket for wireless module.

Mini-card socket for Wi-Fi module

Note the socket has a break among the connector .

The module's key notch should meet the connector's break.

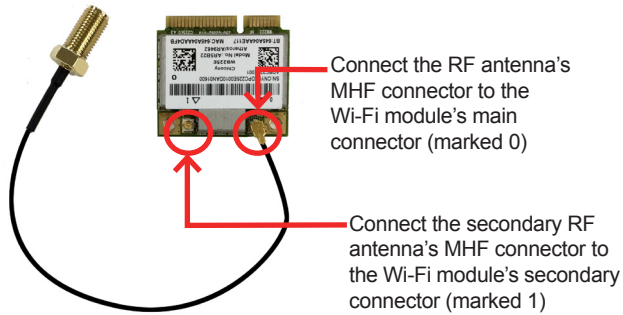

2. Prepare the Wi-Fi module kit. The module is a half-size module of **PCI Express Mini-card** form factor, with two U.FL connectors, one is "MAIN", and the other is "AUX".

3. Have the RF antenna. The antenna has an SMA connector on one end and an MHF connector on the other.

4. Connect the RF antenna's MHF connector to the Wi-Fi module's main connector marked 0. If you are going to connect a secondary antenna, connect it to the connector marked 1.

5. Plug the Wi-Fi module to the socket's connector by a slanted angle. Fully plug the module, and note the notch on the wireless module should meet the break of the connector.

6. Press the module down and fix the module in place using two screws.

7. Remove a plastic plug from the computer's bottom (or top) side to make an antenna hole. Keep the plastic plug for any possible restoration in the future.

8. From the other end of the RF antenna, which is an SMA connector, remove the washer and the nut. Save the washer and nut for later use. Note the SMA connector has the form of a threaded bolt, with one flat side.

9. Pull the SMA connector through the above mentioned antenna hole. Note to meet the aforesaid flattened side with the antenna hole's flat side.

Arrange the flat side of the SMA connector to meet the flat side of the antenna hole.

10. Mount the washer first and then the nut to the SMA connector. Make sure the nut is tightened.

Mount the washer and the nut to the SMA connector. Tighten the nut.

11. Restore the computer's bottom cover and fasten the screws.

12. Have the external antenna(s). Screw and tightly fasten the antenna(s) to the SMA connector.

4.2.1. Install mSATA Module

To install an mSATA storage module to the computer:

1. Locate the socket for mSATA modules.

2. Confront the mSATA module's edge connector with the socket's connector. Align the module's key notch the connector's break.

3. Fully plug the module until it cannot be plugged any more.

4. Press the module down and fix the module in place using two screws.

4.2.1. Install SSD or HDD

The PKPX8115 / 8110 / 8120 / 8125 comes with two 2.5" drive bays for 2.5" HDD or SSD storage device. To install 2.5" HDD or SSD to the computer,

1. Locate the 2.5" drive bays inside the computer.

2. For the drive bay you want to use, remove the 2 screws securing the bracket.

3. Fix the 2.5" HDD or SSD storage device to the bracket you just removed using 2 screws coming with the storage device kit.

- Slide the storage device into the SATA connector. Then fix the bracket using the 2 screws removed in step 2.

SATA Connector

- Repeat steps 2 to 5 to install 2.5" HDD or SSD to the other bay.

4.3. Mount the Computer

Integrate the computer to where it works by mounting it to a wall in the surroundings or to the rear of a display panel.

4.3.1. Panel Mounting

For PKPX8115 and PKPX8110 / PKPX8120 / PKPX8125

1. Put the panel PC into correct-sized opening on a panel or other fixture.
2. Put the provided panel-mounting clamps into holes around edges of the panel PC.
3. Tightly fasten the panel-mounting clamps around edges.

Example of PKPX8115

Example of PKPX8110 / 8120 / 8125

PKPX8100 / PKPX8105

The PKPX8100 / PKPX8105 comes with optional panel mounting brackets for panel mounting. Follow the steps below to mount the computer on a panel.

1. Disassembly the rear cover as described in [4.1. Disassembly the Computer](#) on page [58](#).
2. Remove the cover plate of the holes for the mounting brackets. Secure the mounting brackets to the rear cover by fastening the 3 screws. Then restore the rear cover to the computer.

3. Put the panel PC into correct-sized opening on a panel or other fixture.

4. Put the provided panel-mounting clamps into holes around edges of the panel PC.
5. Tightly fasten the panel-mounting clamps around edges.

4.3.2. VESA Mounting

4.3.2.1. Use VESA Arm

To integrate the computer to a VESA arm:

1. Find the VESA mounting holes on the Panel PC. The VESA specifications varies according to your model.

2. Attach the VESA arm to the rear of the computer by meeting the mounting holes on the VESA arm and VESA bracket.
3. Fix the assemblage with four screws.

BIOS

The BIOS Setup utility for the Fanless Touch Panel-PC series / 8115 is featured by American Megatrends Inc to configure the system settings stored in the system's BIOS ROM. The BIOS is activated once the computer powers on. When the computer is off, the battery on the main board supplies power to BIOS RAM.

To enter the BIOS Setup utility, keep hitting the “Delete” key upon powering on the computer.

Key Commands

The BIOS Setup utility relies on a keyboard to receive user's instructions. Hit the following keys to navigate within the utility and use the utility.

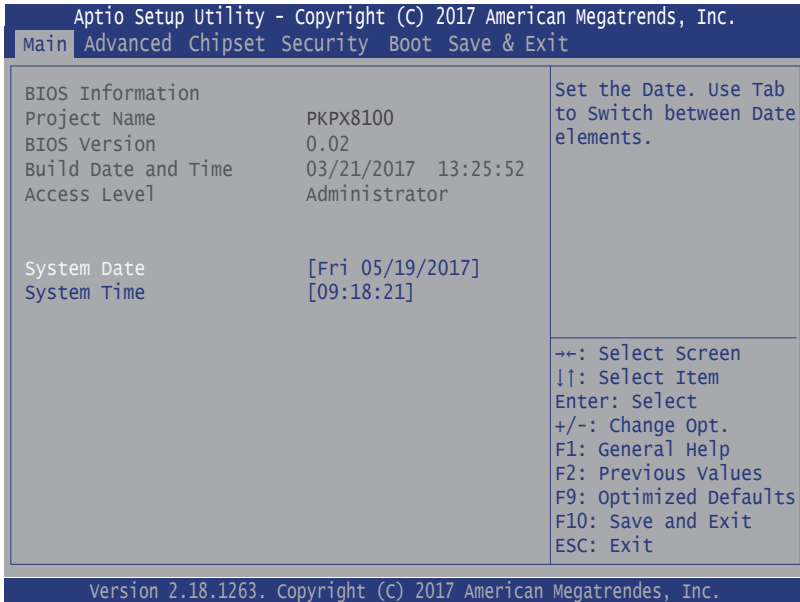

Keystroke	Function
← →	Moves left/right between the top menus.
↓ ↑	Moves up/down between highlight items.
Enter	Selects an highlighted item/field.
Esc	<ul style="list-style-type: none"> ▶ On the top menus: Use Esc to quit the utility without saving changes to CMOS. (The screen will prompt a message asking you to select OK or Cancel to exit discarding changes. ▶ On the submenus: Use Esc to quit current screen and return to the top menu.
Page Up / +	Increases current value to the next higher value or switches between available options.
Page Down / -	Decreases current value to the next lower value or switches between available options.
F1	Opens the Help of the BIOS Setup utility.
F10	Exits the utility saving the changes that have been made. (The screen then prompts a message asking you to select OK or Cancel to exit saving changes.)

Note: Pay attention to the "WARNING" that shows at the left pane onscreen when making any change to the BIOS settings.

This BIOS Setup utility is updated from time to time to improve system performance and hence the screenshots hereinafter may not fully comply with what you actually have onscreen.

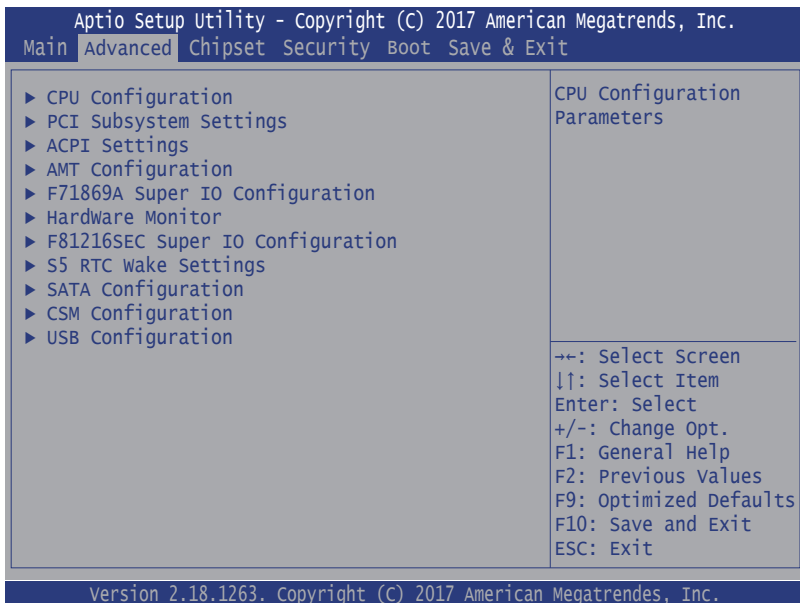

5.1. Main

The **Main** menu features the settings of **System Date** and **System Time** and displays some BIOS info.

Setting	Description
Project Name	Delivers the model name of the computer.
BIOS Version	Delivers the computer's BIOS version.
Build Date and Time	Delivers the date and time when the BIOS Setup utility was made/updated.
Access Level	Delivers the level that the BIOS is being accessed at the moment.
System Date	Sets system date.
System Time	Sets system time.
